ARIC MANUSCRIPT PROPOSAL FORM

Manuscript #043 (WITHDRAWN)

1. Title (length 26):
4 Center Sociodemographics

2. Writing Group (list individual with lead first):
(lead) Watson            Heiss              Szklo
               Hutchinson              Folsom
               Ed Davis               Conwill
               Tyroler                 Williams

3. Timeline:
Must await completion of year 3 data collection (i.e. completion of recruitment)

4. Rationale:
In order to place in perspective differences in Coronary Heart Disease Risk Factors between the Jackson black cohort and the predominantly white cohorts in the three other centers, it is necessary to have an awareness of differences in sociodemographic factors between these populations.

5. Main Hypothesis:
Major sociodemographic differences exist between the black and white cohorts.

6. Data (variables, time window, source, inclusions/exclusions):
Data variables will include factors such as education level, annual income, occupations, health insurance, marital status, membership in church or synagogue.
