

Instructions for Completing the Drinker Inventory of Consequences

This self-administered questionnaire was developed with the goal of being a consensus instrument for the treatment field for assessing negative consequences of drinking. The items survey negative consequences in a variety of domains: physical, interpersonal, intrapersonal, impulse control, and social responsibility.

Baseline:

The DrInC will be collected at baseline. Use past 90 days as the time frame.

If applicable, relay relevant baseline information to the CBI therapist for Personal Feedback Report and the MM clinician for the Clinician Report Form.

Follow-up:

The DrInC will also be collected during weeks 8, 16, 26, 52, and 68. Use since last interview as the time frame.

Hand Scoring for Personal Feedback Report:

See page 2 (scoring sheet)

Automated Scoring for Personal Feedback Report:

See page 34 of COMBINE Trial Data Management System Users Guide (Version 1.3 December 10, 2001).

DrInC Scoring Sheet

Physical	Inter- personal	Intra- personal	Impulse Control	Social Responsibility	Control Scale*
1_____		2_____		3_____	
	4_____			6_____	5_____
	7_____				
8_____			9_____		
			10_____		
11_____		12_____			
13_____				14_____	15_____
		16_____			
	17_____	18_____	19_____	20_____	
	21_____		22_____		
			23_____		
24_____					25_____
				26_____	
	27_____		28_____		
29_____	30_____				
	31_____		32_____		
33_____		34_____			35_____
		36_____

_____ + _____ + _____ + _____ + _____ = _____

Physical	Inter- personal	Intra- personal	Impulse Control	Social Responsibility	Total DrInC Score	Control Scale*
(Ph)	(Re)	(Pe)	(Im)	(Sr)	(Tot)	

INSTRUCTIONS: For each item, copy the circled number from the answer sheet next to the item number above. Then sum each column to calculate scale totals. Sum these totals to calculate the total DrInC score.
 * Zero scores on Control Scale items may indicate careless or dishonest responding. On version 2R (Recent Drinking), totals of 5 or less are suspect.
