

Instructions for Completing Medication (Non) Compliance Checklist

Data Collection:

The checklist should be completed for **ALL** patients assigned to MM whether s/he is compliant or noncompliant.

The Medication Non-Compliance Checklist documents whether the participant was medication compliant. If the patient is medication compliant, only items 1 and 2 need to be completed. If the participant is medication non-compliant, items 1, 2 and 3 should be completed. The primary reason(s) for non-compliance should be documented. The checklist is completed at every MM session.

Data Entry:

If YES is checked for item 2 Patient took all pills as prescribed , then NO should be entered for items 3a through 3u.
